Evaluation of Montana's Water Resources

Using a Water
Budget Approach

Table of Contents

Introduction	1
Water Rights	2
REALTOR® Legislative Position Statement on Water	2
Closed Basins	3
Surface Water and Groundwater Interaction	4
Population Growth and Water Demands	4
Water in Montana Compared to Other Western States	4
Groundwater Levels	5
Hydrologic Cycle	5
Water Budgets	6
What is Montana's Overall Water Budget?	7
Some Basic Terminology	7
What is the Projected Impact of Population Growth?	8
Local Scale Water Rights	9
What About Water Budgets at the Local Scale?	9
Gallatin Valley Water Resources	9
What Is the Influence of Snowpack on the Water Budget of Gallatin Valley?	11
What Is the Water Consumption in the Gallatin Valley?	13
Has Overall Water Consumption in the Gallatin Valley Changed Over Time?	14
Has Groundwater Storage Changed in the Gallatin Valley?	14
What About Seasonal Variations in Flow During Drought Periods?	15
What Are the Projected Impacts of Increased Growth?	16
Summary for Gallatin Valley	16
Additional Areas of Investigation	17
Bitterroot Valley (Ravalli County)	17
Lewis and Clark County	18
North Hills Controlled Groundwater Study	19
Missoula County	20
Montana Bureau of Mines & Geology Case Studies	21
Lower Beaverhead Watershed Case Study	21
Bitterroot Watershed Case Study	21
Gallatin Valley Watershed Case Study	21
Summary	22
Recommendations	23
References	24

This report examines the water resources situation in selected closed basins in Montana using basic hydrologic principles that are predicated on a scientific methodology known as the Water Budget.
